

28th July 2023

To: Talent Houz,

Dear Talent Houz Hiring Manager,

I am interested to join, learn, and contribute to your team as a React Native mobile programmer.

I am transitioning from a game development into mobile programmer, thus I have built several personal React Native projects as substitute for professional experience. You can view said projects from the attached resume or portfolio.

Besides that, there are also few notable transferrable skills from my past experiences:

- Write readable, scalable, & maintainable, yet performant codes, as per nature of game development.
- Handle and manage multiple programming languages at the same time for each stack.
- Develop and handle cross-platform applications and devices, which includes Windows, Android, and web.
- Implement backend Google services such as Firebase Firestore, Firebase Authentication, and Play Games.
- Design and manage both SQL and noSQL databases.
- Develop basic networking using APIs and libraries.
- Perform software version controls using repositories such as Github and Gitlab.
- Cater software to user experience and emotions.
- Collaborate with diverse parts of the team such as fellow programmers, backend developers, tech support, graphic artists, and salespeople.
- Accustomed to Agile methodologies.
- Perform and getting involved in elicitations of client requirements and specifications.
- Prepare and execute external testings, including the post-test surveys.
- Document software designs and features for self and others' reference.

Therefore, I am confident that I will be able to adapt efficiently into your team through these skillset. I am also willing to learn in case of any lack.

Thank you for your time.

Please feel free to inquire any additional information.

Best Regards,

Hans
